

Third European Summer School
HYDROGEN SAFETY

Marie Curie Conferences and Training Courses

The Commission of the European Communities

CONTENTS

- [Progress in Hydrogen Safety – International short course series](#)
- [3rd ESSHS Programme](#)
- [Bios of keynote speakers](#)
- [Bios of delegates](#)

Keynote lectures

- J. Lee (McGill University): [“Explosion primer – definitions of basic combustion parameters”](#)
- J. Shepherd (Caltech): [“Explosion effects”](#)
- E.Oran and V.Gamezo (U.S. Naval Research Lab): [“The deflagration-to-detonation transition in gas-phase combustion”](#)
- E.Oran, V.Gamezo (U.S. Naval Research Lab), T.Ogawa (Seikei University): [“Flame acceleration and DDT in channels with obstacles”](#)
- F.Williams (UCSD): [“New developments in the understanding of hydrogen laminar burning velocities and spontaneous ignition”](#)
- K.Hayashi (Aoyama Gakuin University), N.Tsuboi (Institute of Space and Astronautical Science): [“Fundamentals of hydrogen ignition and high pressure hydrogen jet auto-ignition”](#)
- P.Sunderland (University of Maryland): [“Fire hazards of small hydrogen leaks”](#)
- P.Sunderland (University of Maryland): [“Pressure relief devices for hydrogen vehicles”](#)
- D.Bradley (University of Leeds): [“Flame instabilities, turbulent burning velocities and deflagration/detonation transition of hydrogen-air”](#)
- D.Bradley (University of Leeds): [“Hydrogen powered vehicles for road transport”](#)
- Th.Hübert (BAM): [“Gas sensors for hydrogen safety”](#)
- G.Newsholme, P.Donnely (HSE): [“Using ATEX and industry best practice to manage the risk from hydrogen in conventional and nuclear workplaces”](#)
- S.Dorofeev (FM Global): [“Flame acceleration and transition to detonation: a framework for estimating potential explosion hazards in hydrogen mixtures”](#)
- C.San Marchi, B.Somerday, K.Nibur, M.Yip (Sandia National Laboratories): [“Structural-metals considerations for the containment of high-pressure hydrogen gas”](#)
- B.Somerday, C.San Marchi (Sandia National Laboratories): [“Effects of hydrogen gas on steel vessels and pipelines”](#)
- C.San Marchi, B.Somerday (Sandia National Laboratories): [“Effects of high-pressure gaseous hydrogen on structural metals”](#)
- J.LaChance (Sandia National Laboratories): “Quantitative risk assessment of hydrogen facilities”
- M.Groethe (SRI): [“Large-scale testing: Part I”](#)
- M.Groethe (SRI): [“Large-scale testing: Part II”](#)
- S.Woods (NASA White Sands Test Facility): [“Aerospace hydrogen hazard assessment”](#)
- A.Ruiz (U.S. DoE): [“DOE hydrogen program overview”](#)
- Buncefield Major Incident Investigation Board (UK): [“Recommendations on land use planning and the control of societal risk around major hazard sites”](#)

*Supported by*The European Network of Excellence “Safety of Hydrogen as an Energy Carrier” (www.hysafe.org)

Built Environment Research Institute, University of Ulster

International Partnership for the Hydrogen Economy
